Lahore

SUMMARY

SQA Engineer with 1+ year of hands-on experience in manual testing of Microsoft Power Platform, Dynamics 365, mobile (Android & iOS), tablet, and TV applications. Skilled in creating and executing detailed test cases, performing functional, regression, and UI testing, and identifying defects early in the development cycle. Experienced with API testing using Postman and familiar with automation tools such as Selenium and EasyRepro. Strong team collaborator with working knowledge of Agile methodologies and a keen interest in expanding expertise in test automation and cross-platform quality assurance.

EDUCATION

BSCS

University of Sargodha
2017 – 2021

Intermediate

Rashid Minhas College, Chichawatni
2015 – 2017

SKILLS & EXPERTISE

- Mobile & Cross-Platform Testing: Android, iOS, tablet & TV apps – functionality, usability, and UI/UX validation.
- Manual Testing: Test case design, execution & defect reporting for web and cross-platform apps.
- Power Platform: Testing Power Apps, Power Automate & Power BI modules.
- Dynamics 365: CRM & ERP module validation, functional & regression testing.
- Bug Tracking: Azure DevOps & Jira – defect tracking, reporting & test management.
- API Testing: REST API validation using Postman.
- Agile Practices: Scrum, sprint planning, daily standups & retrospectives.
- Attention to Detail: Identify UI/UX issues & edge-case defects.

KEY ACHIEVEMENTS

- Improved product stability and user experience by resolving critical defects across web, mobile, tablet, and TV applications.
- Supported successful launches of Power Platform and Dynamics 365 apps through effective quality testing.
- Enhanced test coverage, reduced defect leakage, and streamlined release cycles through improved workflows and cross-functional collaboration.
- Actively participated in Agile ceremonies and contributed to continuous test process improvements and root cause analysis.

CERTIFICATIONS

- PL-200 Power Platform Functional Consultant Associate

PROFESSIONAL EXPERIENCE

QA Analyst

Cloud Surge | Aug 2024 - Aug 2025

- Executed functional, regression, and integration testing for Power Platform and Dynamics 365 apps.
- Authored test cases and logged defects using Azure DevOps.
- Participated in Agile ceremonies, including sprint planning and daily stand-ups.
- Collaborated with developers and business analysts to validate requirements and resolve issues.
- Reported and tracked bugs, ensuring timely resolution and delivery quality.
- Gained exposure to automation testing using Selenium and EasyRepro for initial scripts.

SQA Engineer

Masjidal | Sep 2025 - Present

- Manual testing of Android, iOS, tablet, and TV apps for functionality, usability, and UI/UX consistency.
- Designed and executed test cases, logged defects in Jira, and verified fixes across platforms.
- Performed functional, regression, and end-to-end testing to ensure product quality.
- Collaborated with cross-functional teams to enhance stability and user experience.
- Participated in Agile/Scrum ceremonies and supported process improvements for faster releases.

PROJECTS

- CKD (Chronic Kidney Disease):** Validated disease detection logic using ACR, GFR, and BP data; ensured accurate analysis and medication outputs from SharePoint files.
- GP Triage:** Tested bot-based appointment booking and verified NHS system integrations.
- HR App:** Tested onboarding, payroll, leave, and workflow modules across multiple roles.
- Employee Connect:** Validated self-service features for profiles, leave, payroll, and appraisals.
- Issue Tracker:** Verified ticket creation, issue logging, and role-based access controls.
- Athan+ (Android & iOS):** Tested prayer time, mosque locator, Qibla, and widget features; ensured smooth cross-device performance.
- Athan Frame:** Tested real-time mosque display integrations and mobile/web synchronization.
- Al-Iqamah:** Verified masjid timing accuracy, event updates, and data sync across devices.
- Masjidal TV App:** Tested live prayer time display and compatibility across smart TV models.
